KASIDATE PHLAIPHUEAK

< SOFTWARE DEVELOPER />

Bangkok • 098 303 0214 • bankkasidate@gmail.com • github.com/kasidatep

SUMMARY

Full-stack software developer with hands-on experience in building AI-powered applications, scalable microservices, and real-time web systems using technologies like GPT-4, Redis, NestJS and Next.js. Previously developed production-ready chatbot flows for LINE and Messenger with deep integration into business logic. Proficient in both frontend and backend development using JavaScript/TypeScript ecosystems. Thrive in agile teams and fast-paced environments, with a strong focus on problem-solving and clean architecture.

WORK EXPERIENCE

Chatbot Developer, Amity Solutions **JAN 2024 - JUL 2024**

INTERNSHIP

- Developed chatbot solutions for Facebook Messenger and LINE platforms
- Implemented chatbot flows based on changing requirements
- Created web Frontend components for integration with the company's Chat SDK
- Collaborated in an agile development environment with daily stand-ups and sprint planning

EDUCATION

Bachelor of Science in Information Technology **2021 - 2025**

King Mongkut's University of Technology Thonburi

GPAX 3.78

- Senior Project in AI-Powered Travel Planning Application

PROJECTS

I'm Guide: AI-Powered Travel Planning Application **2025**

Developed comprehensive AI-driven travel planning platform for Thailand tourism

- Frontend: Responsive Next.js app with LIFF for LINE OA integration
- Backend: Microservice NestJS architecture with GPT-4o for AI-powered trip recommendations
- Automation: Node-RED message flows for LINE interaction automation
- Performance: Redis caching with hybrid MongoDB/MySQL for real-time scalability

Technologies: Next.js, LIFF, NestJS, Node-RED, GPT, Langchain.js, Redis, MongoDB, MySQL, LINE Messaging API

URL Shortener **2025**

- Developed modern URL shortening service using Next.js 14, MongoDB, TailwindCSS, Framer Motion, TypeScript
- Supported custom short links, password protection with BCrypt, and expiration controls (by time or click count)
- Integrated QR code generation for easy sharing
- Backend implemented with API Routes and Mongoose, optimized for production deployment

Technologies: Next.js, MongoDB, Typescript, Tailwind CSS

SAS: SIT Announcement Systems **2023**

- Frontend: Developed a dynamic Vue.js interface for real-time announcements
- Backend: Java Spring Boot REST APIs with Microsoft Azure AD login, integrated mail service for notifications, and file service for attachment handling
- Deployment: Dockerized for reliable, production-grade CI/CD across environments

Technologies: Vue.js, Java Spring Boot, Docker

e-Library Frontend **2023**

- Built a responsive frontend with Vue.js, designing clean architecture and user-centric workflows
- Integrated mock backend using JSON Server with full CRUD operations via RESTful APIs

Technologies: Vue.js, JSON Server, REST API

ADDITIONAL INFORMATION

Frontend: HTML, CSS, JavaScript, TypeScript, Vue.js, React.js, Next.js, Tailwind CSS, Bootstrap, Ant Design
Backend: Node.js, Express, NestJS, Java Spring Boot, Java Servlets
Database: MySQL, MongoDB, Redis
API Integration: LINE Messaging API, RESTful API design
Dev Tools: Git, Docker, Node-RED
Languages: Thai (native), English (good)

COMPETENCIES

Excellent problem-solving and analytical skills
Strong attention to detail with a focus on code quality
Passionate about emerging technologies including AI and cloud computing
